

The number of ported numbers in the second quarter of 2023

The number of mobile telephone subscriptions ported from operator to operator exceeded 15.1 million

Suomen Numerot Numpac Oy provides services to the telecommunications operators that are required under the number porting regulation and other related legislation.

Numpac's range of services includes the Number Portability Services for mobile and fixed communications networks, the Call Routing Services, the Numpac Query Service for mobile telephone service providers for identifying the current mobile operator and information service for ported numbers intended for consumers.

In the second quarter of 2023, the number of ported mobile telephone numbers was 127.734. Overall, already over 15,1 million mobile telephone subscriptions have been ported from operator to operator in Finland.

The number of ported fixed network telephone numbers was 5.070 in the second quarter of 2023.

Number portability in Finland is executed by the Master Database which is administered by Numpac. The Master Database is a joint database for all ported mobile and fixed network numbers. Calls are routed through the telecommunications networks by the information given by the ported numbers in the Master Database.

Graphs and statistics of the number portability are available on www.numpac.fi.
